BOIL ADVISORY FOR OSCIE ORA AREA

Carl Junction: (JANUARY 30, 2026)

The City of Carl Junction Water Dept has experienced a Water Main break in the Oscie Ora at Sunset Dr and Sunset Loop. Due to the pressure dropping in the water main, the City has issued a precautionary boil water advisory. Water may be shut off in your area so that repairs can begin immediately.

Customers in the Oscie Ora subdivision are advised to take the following precautions:

- Boil water for three minutes prior to using it for cooking or drinking.
- Do not use ice from an automatic ice maker. Remake ice with water that has been boiled.
- Disinfect dishes and food contact surfaces by immersing for one minute in a clean tap water that contains one teaspoon of unscented bleach per gallon of water.

Water service will be restored this afternoon when the repair is completed and the line will be disinfected. Two clean water samples will be taken and will take up to 24 hrs to obtain analysis. When water tests verify that the water is safe for drinking, the residents will be alerted that the boil advisory has ended.

For additional information concerning Boil Orders and Boil Water Advisories contact the Missouri Department of Natural Resources, Water Protection Program at 800.361.4827 or www.dnr.mo.gov/env/wpp.

This Boil Advisory does not affect the whole City of Carl Junction but only those residents living in the Oscie Ora area.

Mission Statement

The City of Carl Junction will represent our citizens, provide high level services, and plan for the future of our community.
